1) category

☐ select all

☒ Travel

☐ Food

☐ Vlog

☐

← like this, all filters will have a pop-up window of list boxes for unique filters

if general is chosen:

EXPLANATION

filter 1 ▾

filter 2 ▾

graph

table

same filters as earlier <sup>(save out of space)</sup> but region is also an option now.

title/description contains f-3

title contains:

input box for word or string.

Form filters with quantitative data:

☐ 1k - 2k  
☐ 2k - 3k  
⋮  
☐

custom:  
 to

← custom option will remove & override checkbox filter

error handling: some filters, individually or alongside another filter, will not be able to have a graphical output.

ERROR!

graph not possible

the graphs will be pre-made for all possible query except custom in quant data filters. the output will be the pic of the same.

\* we will look into making graphs in run-time using matplotlib for custom function in quant if possible.
